LearnWise AI — Lean Canvas

IBM SkillsBuild Applied AI/ML Virtual Internship | SDG 4: Quality Education

PROBLEM

- Students may not know which topics need practice.
- Generic quizzes give the same content to everyone.
- Teachers have limited time for individual learning-gap analysis.

SOLUTION

- Analyze student answer history.
- Calculate topic/subtopic accuracy.
- Rank learning gaps.
- Recommend a focused adaptive quiz.

UNIQUE VALUE PROPOSITION

“Practice the right topic at the right difficulty, based on your own learning history.”

UNFAIR ADVANTAGE

- Student-level learning-gap profile.
- Explainable topic accuracy.
- Adaptive recommendation loop.
- Can be extended with multilingual/LLM content generation.

CUSTOMER SEGMENT

- School/college students
- Teachers and mentors
- Coaching/learning platforms
- Institutions using digital learni

EXISTING ALTERNATIVES

- Static question banks
- Generic online quizzes
- Manual teacher assessment
- One-size-fits-all LMS practice

KEY METRICS

- Topic accuracy
- Quiz completion rate
- Improvement after recommended practice
- Recommendation acceptance
- F1/accuracy of prediction model

CHANNELS

- College/school pilots
- LMS integration
- Web application
- Teacher demonstrations
- Student communities

HIGH-LEVEL CONCEPT

“Duolingo-style adaptive practice for mathematics, driven by student performance data.”

EARLY ADOPTERS

- Students preparing for exams
- Students struggling in specific
- Teachers wanting quick diagn

COST STRUCTURE

- Development and maintenance
- Cloud hosting
- Data/ML experimentation
- Question-bank creation and validation

REVENUE STREAMS

- Institutional subscriptions
- Premium student plans
- B2B LMS integration
- Optional analytics/dashboard plans

Based on the Lean Canvas structure supplied in the IBM SkillsBuild project guidance.
